Introduction

Overview

Goldman Sachs International Bank Johannesburg Branch (the branch) is a branch of Goldman Sachs International Bank (the head office) and is incorporated and domiciled in the Republic of South Africa.

Goldman Sachs International Bank (GSIB) is a UK-domiciled bank involved in lending and deposit-taking activities, securities lending, and a primary dealer for European government bonds.

The branch's ultimate parent undertaking and controlling entity is The Goldman Sachs Group, Inc. (Group Inc.), a Delaware corporation, which together with its consolidated subsidiaries (collectively, the firm), is a leading global financial institution that delivers a broad range of financial services across investment banking, securities, investment management and consumer banking to a large and diversified client base that includes corporations, financial institutions, governments and individuals. When we use the terms "Goldman Sachs" and "the firm", we mean Group Inc. and its consolidated subsidiaries and when we use the terms "the branch", "we", "us" and "our", we mean Goldman Sachs International Bank Johannesburg Branch.

The Board of Governors of the Federal Reserve System (FRB) is the primary regulator of Group Inc., a bank holding company (BHC) under the U.S. Bank Holding Company Act of 1956 and a financial holding company under amendments to this Act. The firm is subject to consolidated regulatory capital requirements which are calculated in accordance with the regulations of the FRB (Capital Framework).

The capital requirements are expressed as risk-based capital and leverage ratios that compare measures of regulatory capital to risk-weighted assets (RWAs), average assets and off-balance-sheet exposures. Failure to comply with these capital requirements could result in restrictions being imposed by our regulators and could limit our ability to repurchase shares, pay dividends and make certain discretionary compensation payments. The branch's capital levels are also subject to qualitative judgements by the regulators about components of capital, risk weightings and other factors.

For information on Group Inc.'s financial statements and regulatory capital ratios, please refer to the firm's most recent Quarterly Pillar 3 Disclosures and Quarterly Report on Form 10-Q. References to the "Quarterly Report on Form 10-Q" are to the firm's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2021.

This quarterly disclosure for the branch has been prepared for the three-month period ended June 30, 2021, in line with the accounting reference date for GSIB. All references to June 2021 refer to the three-month period ended thereof, or the date, as the context requires, June 30, 2021.

The branch is supervised by the South African Reserve Bank (SARB) and as such is subject to minimum capital adequacy standards. Quarterly disclosures are prepared in accordance with the Basel Committee on Banking Supervision (BCBS)'s revised pillar 3 disclosure requirements, and the SARB Directive 1 of 2019 issued in terms of section 6(6) of the Banks Act No. 94 of 1990 and Regulation 43(1) of the regulations relating to banks.

Measures of exposures and other metrics disclosed in this report may not be based on International Financial Reporting Standards (IFRS), may not be directly comparable to measures reported in financial statements, and may not be comparable to similar measures used by other companies or branches. These disclosures are not required to be, and have not been, audited by our independent auditors.

Definition of Risk-Weighted Assets

The risk weights used in the calculation of RWAs reflect an assessment of the riskiness of our assets and exposures. These risk weights are based on either predetermined levels set by regulators or on internal models which are subject to various qualitative and quantitative parameters that are subject to approval by our regulators. The relationship between available capital and capital requirements can be expressed in the form of a capital ratio.

Capital Framework

Capital Structure

For regulatory capital purposes, the total available capital has the following components:

- Common Equity Tier 1 capital (CET1), which is comprised of endowment capital from GSIB, after giving effect to deductions for disallowed items and other adjustments;
- Tier 1 capital which is comprised of CET1 capital and other qualifying capital instruments; and
- Tier 2 capital, which is not currently applicable for GSIBJB.

Certain components of our regulatory capital are subject to regulatory limits and restrictions under the rules. In general, to qualify as Tier 1 or Tier 2 capital, an instrument must be fully paid and unsecured. A qualifying Tier 1 or Tier 2 capital instrument must also be subordinated to all senior indebtedness of the organisation.

Regulatory Capital Ratios

The risk-based capital requirements are expressed as capital ratios that compare measures of regulatory capital to RWAs. The CET1 ratio is calculated as CET1 divided by RWAs. The Tier 1 capital ratio is defined as Tier 1 capital divided by RWAs. The Total capital ratio is defined as Total capital divided by RWAs.

Compliance with Capital Requirements

As of June 30, 2021, the branch had capital levels in excess of its minimum regulatory capital requirements.

On August 10, 2021, R150mn of share capital was injected to the branch to sustain planned business growth.

Credit Risk

Credit risk represents the potential for loss due to the default or deterioration in credit quality of a counterparty or an issuer of securities or other instruments we hold. Credit risk comes from cash placed with banks, customer and other receivables.

Credit Risk, which is independent of the revenue-producing units and reports to the firm's chief risk officer, has primary responsibility for assessing, monitoring and managing credit risk through firmwide oversight across the firm's global businesses. In addition, we may hold other positions that give rise to credit risk (e.g., bonds). These credit risks are captured as a component of market risk measures, which are monitored and managed by Market Risk.

Counterparty Credit Risk

Counterparty credit risk represents the risk that a counterparty may default before settlement of the transaction. Counterparty credit risk comes from derivatives and securities financing transactions (i.e., resale and repurchase agreements and securities borrowing and lending activities).

The branch derives the Exposure at Default using the SA CCR which takes the fair value (Replacement cost) + Add-on. Exposure values derived are used to determine RWAs.

Market Risk

Market risk is the risk of loss in the value of inventory, investments, loans and other financial assets and liabilities accounted for at fair value due to changes in market conditions.

Market Risk, which is independent of the revenue-producing units and reports to the firm’s chief risk officer, has primary responsibility for assessing, monitoring and managing market risk through firmwide oversight across global businesses.

Managers in revenue-producing units and Market Risk discuss market information, positions and estimated loss scenarios on an ongoing basis. Managers in revenue-producing units are accountable for managing risk within prescribed limits. These managers have in-depth knowledge of their positions, markets and the instruments available to hedge their exposures.

As of June 30, 2021, we have immaterial market risk exposures in the branch.

Leverage Ratio

The company is required to monitor and disclose its leverage ratio that compares Tier 1 capital to a measure of leverage exposure, defined as the sum of certain assets plus certain off-balance-sheet exposures, less Tier 1 capital deductions.

The table below presents information about the company's leverage ratio.

Table 13: Summary Comparison of Accounting Assets vs Leverage Ratio Exposure (LR1)

		Jun 2021 R'm
1	Total consolidated assets as per the BA 900	1,173
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-
4	Adjustments for temporary exemption of central bank reserves (if applicable)	-
5	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-

Cautionary Note on Forward-Looking Statements

We have included in these disclosures, and our management may make, statements that may constitute "forward-looking statements." Forward-looking statements are not historical facts or statements of current conditions, but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements include statements other than historical information or statements of current conditions.

It is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements. Important factors that could cause our actual results and financial condition to differ from those indicated in these statements include, among others, those discussed in "Risk Factors" in Part I, Item 1A in the firm's 2020 Form 10-K .

Appendix: Index of Tables to BCBS Templates

1. Template KM2, TLAC1, TLAC2, and TLAC3 have not been disclosed per paragraph 3.5.2 of SARB Directive 1 of 2019.
2. Table CCA has not been disclosed as GSIBJB has nothing to report as of Jun 2021.
3. Template CCyB1 has not been disclosed as GSIBJB does not have any credit exposures in jurisdictions where the countercyclical buffer rate is higher than zero.
4. Template CR1, CR2, CR3, CR6, CR7, CR8 and CR10 have not been disclosed as GSIBJB has no relevant exposures as of Jun 2021.
5. Template CCR4, CCR6, CCR7 and CCR8 have not been disclosed as GSIBJB has immaterial/no relevant exposures as of Jun 2021.
6. Template SEC1-4 have not been disclosed as GSIBJB has no securitisation exposure as of Jun 2021.
7. Template MR1 has not been disclosed as GSIBJB has immaterial MR exposures as of Jun 2021.
8. Template MRC, MR2, MR3 and MR4 have not been disclosed as GSIBJB has no MR exposures under IMA as of Jun 2021.
