

**Goldman Sachs International Bank: Best Execution Reports under RTS 28**

This report has been prepared by Goldman Sachs International Bank (“Goldman Sachs”) for the period ending 31 December 2018 (the “Reporting Period”) for the purposes of meeting Goldman Sachs’ regulatory obligations under Article 65(6) of Commission Delegated Regulation 2017/565 and Article 27(6) of Directive 2014/65/EU (“MiFID II”) which requires Goldman Sachs to annually publish (i) the top five venues where it executed clients orders; and (ii) the top five firms to whom it transmitted or placed client orders for execution, in respect of each class of financial instruments noted below. This report also provides information on Goldman Sachs’ assessment of the quality of execution it obtained from these execution venues and firms (based on its internal monitoring), for each class of financial instruments. Goldman Sachs does not guarantee the correctness or completeness of the information in this report and shall not be responsible for or have any liability whatsoever for any loss or damage caused by errors, inaccuracies or omissions in connection with use or reliance on this information. Goldman Sachs reserve the right to amend, update or re-state the information contained in this report at any time.

Please note that this document is not marketing or promotional material, and has been prepared and published on Goldman Sachs’ website solely to ensure compliance with MiFID II disclosure requirements. Goldman Sachs International Bank is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and Prudential Regulation Authority.

1. Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution:

We consider that best execution is generally owed in respect of agency securities lending transactions save where we understand that the client is not placing reliance on us (for example, where the client has provided specific instructions as to the elements of the transaction).

Agency securities lending transactions are those where we act as agent for our client which wishes to lend its securities to borrowers in the market under agreements that our client is a party to as principal with those other counterparties. As these transactions are bilateral, the accompanying Top 5 venues report will represent the top 5 borrowers based on the best execution factors described below.

We consider that the best execution factors for this type of transaction are different to transactions in other financial instruments because of the nature of the transaction as an ongoing collateralized transaction which is not settled to the market daily. To the extent we have determined we have a best execution for a particular transaction, the ranking of the execution factors should typically be as follows:

1. Price
2. Quality of the collateral
3. Stability of the borrow
4. Operational efficiency and reliability
5. Creditworthiness of the counterparty

“Price” in this context means the rate which the client will receive for the loan of its securities. “Stability of the borrow” means the likelihood of the counterparty wishing to return the borrow. “Operational efficiency and reliability” means the likelihood of a failure in terms of settlement, the posting of margin or processing of corporate actions. The remaining execution factors – likelihood of execution, costs, speed, transaction size, nature of the transaction and other considerations to the extent relevant to the efficient execution of the client’s transaction - are generally given equal ranking.

Note that where a client provides specific instructions in respect of the securities lending transaction, the duty of best execution will not apply in respect of aspects of the transaction covered by those specific instructions.

2. Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

N/A

3. Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

N/A

4. Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm’s execution policy, if such a change occurred;

N/A

5. Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

GS only acts as agent only for transactions between professional clients and/ or eligible counterparties. Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

6. Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable.

7. Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27

N/A

8. Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

N/A

1. Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution:

We consider that best execution is generally owed in respect of agency securities lending transactions save where we understand that the client is not placing reliance on us (for example, where the client has provided specific instructions as to the elements of the transaction).

Agency securities lending transactions are those where we act as agent for our client which wishes to lend its securities to borrowers in the market under agreements that our client is a party to as principal with those other counterparties. As these transactions are bilateral, the accompanying Top 5 venues report will represent the top 5 borrowers based on the best execution factors described below.

We consider that the best execution factors for this type of transaction are different to transactions in other financial instruments because of the nature of the transaction as an ongoing collateralized transaction which is not settled to the market daily. To the extent we have determined we have a best execution for a particular transaction, the ranking of the execution factors should typically be as follows:

1. Price
2. Quality of the collateral
3. Stability of the borrow
4. Operational efficiency and reliability
5. Creditworthiness of the counterparty

“Price” in this context means the rate which the client will receive for the loan of its securities. “Stability of the borrow” means the likelihood of the counterparty wishing to return the borrow. “Operational efficiency and reliability” means the likelihood of a failure in terms of settlement, the posting of margin or processing of corporate actions. The remaining execution factors – likelihood of execution, costs, speed, transaction size, nature of the transaction and other considerations to the extent relevant to the efficient execution of the client’s transaction - are generally given equal ranking.

Note that where a client provides specific instructions in respect of the securities lending transaction, the duty of best execution will not apply in respect of aspects of the transaction covered by those specific instructions.

2. Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

N/A

3. Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

N/A

4. Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm’s execution policy, if such a change occurred;

N/A

5. Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

GS only acts as agent only for transactions between professional clients and/ or eligible counterparties. Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

6. Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable.

7. Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27

N/A

8. Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

1. Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution:

We consider that best execution is generally owed in respect of agency securities lending transactions save where we understand that the client is not placing reliance on us (for example, where the client has provided specific instructions as to the elements of the transaction).

Agency securities lending transactions are those where we act as agent for our client which wishes to lend its securities to borrowers in the market under agreements that our client is a party to as principal with those other counterparties. As these transactions are bilateral, the accompanying Top 5 venues report will represent the top 5 borrowers based on the best execution factors described below.

We consider that the best execution factors for this type of transaction are different to transactions in other financial instruments because of the nature of the transaction as an ongoing collateralized transaction which is not settled to the market daily. To the extent we have determined we have a best execution for a particular transaction, the ranking of the execution factors should typically be as follows:

1. Price
2. Quality of the collateral
3. Stability of the borrow
4. Operational efficiency and reliability
5. Creditworthiness of the counterparty

“Price” in this context means the rate which the client will receive for the loan of its securities. “Stability of the borrow” means the likelihood of the counterparty wishing to return the borrow. “Operational efficiency and reliability” means the likelihood of a failure in terms of settlement, the posting of margin or processing of corporate actions. The remaining execution factors – likelihood of execution, costs, speed, transaction size, nature of the transaction and other considerations to the extent relevant to the efficient execution of the client’s transaction - are generally given equal ranking.

Note that where a client provides specific instructions in respect of the securities lending transaction, the duty of best execution will not apply in respect of aspects of the transaction covered by those specific instructions.

2. Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

N/A

3. Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

N/A

4. Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm’s execution policy, if such a change occurred;

N/A

5. Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

GS only acts as agent only for transactions between professional clients and/ or eligible counterparties. Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

6. Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable.

7. Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27

N/A

8. Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

N/A
