

This report has been prepared by Goldman Sachs Paris et Cie ("GSPIC") for the period ending 31 December 2017 (the "Reporting Period") for the purposes of meeting Goldman Sachs' regulatory obligations under Commission Delegated Regulation (EU) 2017/576 ("MiFID II") which requires Goldman Sachs to annually publish (i) the top five venues where it executed clients orders; and (ii) the top five firms to whom it transmitted or placed client orders for execution, in respect of each class of financial instruments noted below. This report also provides information on Goldman Sachs' assessment of the quality of execution it obtained from these execution venues and firms (based on its internal monitoring), for each class of financial instruments.

Please note that information for the Reporting Period has been collated based on the regulatory obligations that applied to Goldman Sachs, its affiliates, brokers and execution venues during that time. In respect of Goldman Sachs and other financial institutions to whom MiFID II applies, those regulatory obligations were different to those that apply to them now and pursuant to which this report has been prepared. Consequently, there are certain sections in this report for which information required under MiFID II for the Reporting Period (i) was not available; (ii) was only available partly; or (iii) was available in a different format. As a result this report has been prepared on a best efforts basis only. The assumptions and available information used to prepare this report may result in inconsistencies in information across asset classes presented herein or, in the case of SFTs, no data being presented and therefore may not accurately reflect the trading activities undertaken by Goldman Sachs during 2017. Please also note that the assumptions and methodologies used to produce this report may not be used for the preparation of future reports.

Goldman Sachs does not guarantee the correctness or completeness of the information in this report and shall not be responsible for or have any liability whatsoever for any loss or damage caused by errors, inaccuracies or omissions in connection with use or reliance on this information.

Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution:

When assessing the relative importance given to execution factors, Goldman Sachs Paris ("GSPIC") will take into account the following criteria for determining the relative importance of the execution factors in the circumstances:

- the characteristics of the client including the regulatory categorisation of the client;
- the characteristics of the Relevant order;
- the characteristics of financial instruments that are the subject of the Relevant order; and
- the characteristics of the execution venue to which that Relevant order can be directed.

Subject to any specific instructions, taking into account the criteria above, GS will generally give the highest priority to net price. The remaining execution factors are generally given equal ranking.

We may prioritise one or more of the other execution factors if: (i) there is insufficient immediately available liquidity on the relevant execution venues to execute the relevant order in full; or (ii) where a client instructs us to work a relevant order over a period of time or by reference to a benchmark calculated over a period of time (such as VWAP); or where (iii) we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client, we may prioritise one or more of the other execution factors. In these cases, we will determine the relative priority of each execution factor on an order-by-order basis, where the order is executed manually, and by order type (e.g. iceberg, VWAP), where the order is executed using an algorithm.

We have a degree of discretion in how to apply the different execution factors and this may result in a range of different permissible approaches to executing client orders.

For further information on GS' best execution arrangements please refer to the relevant summaries which are available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Goldman Sachs and persons connected with Goldman Sachs provide diversified financial services to a broad range of clients and counterparties and circumstances may arise in which Goldman Sachs may have a conflict of interest.

GSPIC is a member of the Goldman Sachs group of companies. Execution quality received from affiliated entities to whom GSPIC may receive and transmit orders is subject to the same monitoring and assessment utilized by GSPIC within the EMEA Securities Division Best Execution policy summary.

For further details on the execution venues used by GSPIC and its conflicts of interest policy, please refer to the EMEA Securities Division Best Execution policy summary which is available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Not applicable.

Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

There has been no change to the execution venues listed in GS' execution policy for the reporting period.

Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

A client's regulatory categorisation is an important factor both in the assessment of whether the client is relying on GS to deliver best execution and in providing best execution.

The starting presumption is that professional clients do not legitimately rely on GS to protect their interests; however, these presumptions may be revised depending on the application of the four-fold test for determining legitimate reliance (set out below) to the particular circumstances of GS' interaction with the client and how the market operates for the relevant product.

Legitimate Reliance:

To determine whether a client is legitimately relying on GS to protect its interests, the following factors are considered:

- which party initiates the transaction - where GS approaches the client and suggests that the client should enter into a transaction, it is more likely that the client will be placing reliance on GS. Where the client initiates the transaction it is less likely that the client will be placing reliance on GS;
- market practice and the existence of a convention to 'shop around' - where the practice in the market in which a business area operates suggests that the client takes responsibility for the pricing and other elements of the transaction (e.g. there is a market convention to "shop around" for a quote), it is less likely that the client will be placing reliance on GS;
- the relative levels of price transparency within a market - if GS has ready access to prices in the market in which we operate and the client does not, it is more likely that the client will be placing reliance on GS. If GS's access to pricing transparency is equal or similar to the client's, it is less likely that the client will be placing reliance on GS; and
- the information provided by GS and any agreement reached - where GS's arrangements and agreements with the client do not indicate or suggest a relationship of reliance, it is less likely that the client will be placing reliance on GS.

Execution Factors

Subject to any specific instructions, GS will generally give the highest priority to:

- net price for professional clients

Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable as GSPIC does not have retail clients.

Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27

Data published under Delegated Regulation (EU) 2017/575 was not available for the reporting period covered by this report. However, GSPIC has in place post execution supervisory monitoring procedures which use market data, where it is available, to assess client transactions against relevant market prices and benchmarks. For products with no observable external market data other criteria are used to benchmark client transactions for monitoring purposes. This monitoring is undertaken on a systematic basis via best execution monitoring systems.

Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

The relevant laws and regulations transposing Article 65 of Directive 2014/65/EU into national legislation did not apply for the reporting period covered by this report.

Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;

When assessing the relative importance given to execution factors, Goldman Sachs Paris ("GSPIC") will take into account the following criteria for determining the relative importance of the execution factors in the circumstances:

- the characteristics of the client including the regulatory categorisation of the client;
- the characteristics of the Relevant order;
- the characteristics of financial instruments that are the subject of the Relevant order; and
- the characteristics of the execution venue to which that Relevant order can be directed.

Subject to any specific instructions, taking into account the criteria above, GS will generally give the highest priority to net price. The remaining execution factors are generally given equal ranking. We may prioritise one or more of the other execution factors if: (i) there is insufficient immediately available liquidity on the relevant execution venues to execute the relevant order in full; or (ii) where a client instructs us to work a relevant order over a period of time or by reference to a benchmark calculated over a period of time (such as VWAP); or where (iii) we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client, we may prioritise one or more of the other execution factors. In these cases, we will determine the relative priority of each execution factor on an order-by-order basis, where the order is executed manually, and by order type (e.g. iceberg, VWAP), where the order is executed using an algorithm.

We have a degree of discretion in how to apply the different execution factors and this may result in a range of different permissible approaches to executing client orders.

For further information on GS' best execution arrangements please refer to the relevant summaries which are available at: <http://www.goldmansachs.com/disclosures/mifid>

Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Goldman Sachs and persons connected with Goldman Sachs provide diversified financial services to a broad range of clients and counterparties and circumstances may arise in which Goldman Sachs may have a conflict of interest.

GSPIC is a member of the Goldman Sachs group of companies. Execution quality received from affiliated entities to whom GSPIC may receive and transmit orders is subject to the same monitoring and assessment utilized by GSPIC within the EMEA Securities Division Best Execution policy summary.

For further details on the execution venues used by GSPIC and its conflicts of interest policy, please refer to the EMEA Securities Division Best Execution policy summary which is available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Not applicable.

Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

There has been no change to the execution venues listed in GS' execution policy for the reporting period.

Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

A client's regulatory categorisation is an important factor both in the assessment of whether the client is relying on GS to deliver best execution and in providing best execution. The starting presumption is that professional clients do not legitimately rely on GS to protect their interests; however, these presumptions may be revised depending on the application of the four-fold test for determining legitimate reliance (set out below) to the particular circumstances of GS' interaction with the client and how the market operates for the relevant product.

Legitimate Reliance:

To determine whether a client is legitimately relying on GS to protect its interests, the following factors are considered:

- which party initiates the transaction - where GS approaches the client and suggests that the client should enter into a transaction, it is more likely that the client will be placing reliance on GS. Where the client initiates the transaction it is less likely that the client will be placing reliance on GS;
- market practice and the existence of a convention to 'shop around' - where the practice in the market in which a business area operates suggests that the client takes responsibility for the pricing and other elements of the transaction (e.g. there is a market convention to "shop around" for a quote), it is less likely that the client will be placing reliance on GS;
- the relative levels of price transparency within a market - if GS has ready access to prices in the market in which we operate and the client does not, it is more likely that the client will be placing reliance on GS. If GS's access to pricing transparency is equal or similar to the client's, it is less likely that the client will be placing reliance on GS; and
- the information provided by GS and any agreement reached - where GS's arrangements and agreements with the client do not indicate or suggest a relationship of reliance, it is less likely that the client will be placing reliance on GS.

Execution Factors

Subject to any specific instructions, GS will generally give the highest priority to:

- net price for professional clients

Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable as GSPIC does not have retail clients.

Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27;

Data published under Delegated Regulation (EU) 2017/575 was not available for the reporting period covered by this report. However, GSPIC has in place post execution supervisory monitoring procedures which use market data,

where it is available, to assess client transactions against relevant market prices and benchmarks. For products with no observable external market data other criteria are used to benchmark client transactions for monitoring purposes. This monitoring is undertaken on a systematic basis via best execution monitoring systems.

Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU;

The relevant laws and regulations transposing Article 65 of Directive 2014/65/EU into national legislation did not apply for the reporting period covered by this report.

Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;

When assessing the relative importance given to execution factors, Goldman Sachs Paris ("GSPIC") will take into account the following criteria for determining the relative importance of the execution factors in the circumstances:

- the characteristics of the client including the regulatory categorisation of the client;
- the characteristics of the Relevant order;
- the characteristics of financial instruments that are the subject of the Relevant order; and
- the characteristics of the execution venue to which that Relevant order can be directed.

Subject to any specific instructions, taking into account the criteria above, GS will generally give the highest priority to net price. The remaining execution factors are generally given equal ranking. We may prioritise one or more of the other execution factors if: (i) there is insufficient immediately available liquidity on the relevant execution venues to execute the relevant order in full; or (ii) where a client instructs us to work a relevant order over a period of time or by reference to a benchmark calculated over a period of time (such as VWAP); or where (iii) we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client, we may prioritise one or more of the other execution factors. In these cases, we will determine the relative priority of each execution factor on an order-by-order basis, where the order is executed manually, and by order type (e.g. iceberg, VWAP), where the order is executed using an algorithm.

We have a degree of discretion in how to apply the different execution factors and this may result in a range of different permissible approaches to executing client orders.

For further information on GS' best execution arrangements please refer to the relevant summaries which are available at: <http://www.goldmansachs.com/disclosures/mifid>

Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Goldman Sachs and persons connected with Goldman Sachs provide diversified financial services to a broad range of clients and counterparties and circumstances may arise in which Goldman Sachs may have a conflict of interest.

GSPIC is a member of the Goldman Sachs group of companies. Execution quality received from affiliated entities to whom GSPIC may receive and transmit orders is subject to the same monitoring and assessment utilized by GSPIC within the EMEA Securities Division Best Execution policy summary.

For further details on the execution venues used by GSPIC and its conflicts of interest policy, please refer to the EMEA Securities Division Best Execution policy summary which is available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Not applicable.

Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

There has been no change to the execution venues listed in GS' execution policy for the reporting period.

Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

A client's regulatory categorisation is an important factor both in the assessment of whether the client is relying on GS to deliver best execution and in providing best execution. The starting presumption is that professional clients do not legitimately rely on GS to protect their interests; however, these presumptions may be revised depending on the application of the four-fold test for determining legitimate reliance (set out below) to the particular circumstances of GS' interaction with the client and how the market operates for the relevant product.

Legitimate Reliance:

To determine whether a client is legitimately relying on GS to protect its interests, the following factors are considered:

- which party initiates the transaction - where GS approaches the client and suggests that the client should enter into a transaction, it is more likely that the client will be placing reliance on GS. Where the client initiates the transaction it is less likely that the client will be placing reliance on GS;
- market practice and the existence of a convention to 'shop around' - where the practice in the market in which a business area operates suggests that the client takes responsibility for the pricing and other elements of the transaction (e.g. there is a market convention to "shop around" for a quote), it is less likely that the client will be placing reliance on GS;
- the relative levels of price transparency within a market - if GS has ready access to prices in the market in which we operate and the client does not, it is more likely that the client will be placing reliance on GS. If GS's access to pricing transparency is equal or similar to the client's, it is less likely that the client will be placing reliance on GS; and
- the information provided by GS and any agreement reached - where GS's arrangements and agreements with the client do not indicate or suggest a relationship of reliance, it is less likely that the client will be placing reliance on GS.

Execution Factors

Subject to any specific instructions, GS will generally give the highest priority to:

- net price for professional clients

Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable as GSPIC does not have retail clients.

Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27;

Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Goldman Sachs and persons connected with Goldman Sachs provide diversified financial services to a broad range of clients and counterparties and circumstances may arise in which Goldman Sachs may have a conflict of interest.

GSPIC is a member of the Goldman Sachs group of companies. Execution quality received from affiliated entities to whom GSPIC may receive and transmit orders is subject to the same monitoring and assessment utilized by GSPIC within the EMEA Securities Division Best Execution policy summary.

For further details on the execution venues used by GSPIC and its conflicts of interest policy, please refer to the EMEA Securities Division Best Execution policy summary which is available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Not applicable.

Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

There has been no change to the execution venues listed in GS' execution policy for the reporting period.

Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

A client's regulatory categorisation is an important factor both in the assessment of whether the client is relying on GS to deliver best execution and in providing best execution. The starting presumption is that professional clients do not legitimately rely on GS to protect their interests; however, these presumptions may be revised depending on the application of the four-fold test for determining legitimate reliance (set out below) to the particular circumstances of GS' interaction with the client and how the market operates for the relevant product.

Legitimate Reliance:

To determine whether a client is legitimately relying on GS to protect its interests, the following factors are considered:

- which party initiates the transaction - where GS approaches the client and suggests that the client should enter into a transaction, it is more likely that the client will be placing reliance on GS. Where the client initiates the transaction it is less likely that the client will be placing reliance on GS;
- market practice and the existence of a convention to 'shop around' - where the practice in the market in which a business area operates suggests that the client takes responsibility for the pricing and other elements of the transaction (e.g. there is a market convention to "shop around" for a quote), it is less likely that the client will be placing reliance on GS;
- the relative levels of price transparency within a market - if GS has ready access to prices in the market in which we operate and the client does not, it is more likely that the client will be placing reliance on GS. If GS's access to pricing transparency is equal or similar to the client's, it is less likely that the client will be placing reliance on GS; and
- the information provided by GS and any agreement reached - where GS's arrangements and agreements with the client do not indicate or suggest a relationship of reliance, it is less likely that the client will be placing reliance on GS.

Execution Factors

Subject to any specific instructions, GS will generally give the highest priority to:

- net price for professional clients

Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable as GSPIC does not have retail clients.

Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27;

Data published under Delegated Regulation (EU) 2017/575 was not available for the reporting period covered by this report. However, GSPIC has in place post execution supervisory monitoring procedures which use market data,

where it is available, to assess client transactions against relevant market prices and benchmarks. For products with no observable external market data other criteria are used to benchmark client transactions for monitoring purposes. This monitoring is undertaken on a systematic basis via best execution monitoring systems.

Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU;

The relevant laws and regulations transposing Article 65 of Directive 2014/65/EU into national legislation did not apply for the reporting period covered by this report.

Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;

When assessing the relative importance given to execution factors, Goldman Sachs Paris ("GSPIC") will take into account the following criteria for determining the relative importance of the execution factors in the circumstances:

- the characteristics of the client including the regulatory categorisation of the client;
- the characteristics of the Relevant order;
- the characteristics of financial instruments that are the subject of the Relevant order; and
- the characteristics of the execution venue to which that Relevant order can be directed.

Subject to any specific instructions, taking into account the criteria above, GS will generally give the highest priority to net price. The remaining execution factors are generally given equal ranking. We may prioritise one or more of the other execution factors if: (i) there is insufficient immediately available liquidity on the relevant execution venues to execute the relevant order in full; or (ii) where a client instructs us to work a relevant order over a period of time or by reference to a benchmark calculated over a period of time (such as VWAP); or where (iii) we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client, we may prioritise one or more of the other execution factors. In these cases, we will determine the relative priority of each execution factor on an order-by-order basis, where the order is executed manually, and by order type (e.g. iceberg, VWAP), where the order is executed using an algorithm.

We have a degree of discretion in how to apply the different execution factors and this may result in a range of different permissible approaches to executing client orders.

For further information on GS' best execution arrangements please refer to the relevant summaries which are available at: <http://www.goldmansachs.com/disclosures/mifid>

Topic 1: an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;

When assessing the relative importance given to execution factors, Goldman Sachs Paris ("GSPIC") will take into account the following criteria for determining the relative importance of the execution factors in the circumstances:

- the characteristics of the client including the regulatory categorisation of the client;
- the characteristics of the Relevant order;
- the characteristics of financial instruments that are the subject of the Relevant order; and
- the characteristics of the execution venue to which that Relevant order can be directed.

Subject to any specific instructions, taking into account the criteria above, GS will generally give the highest priority to net price. The remaining execution factors are generally given equal ranking. We may prioritise one or more of the other execution factors if: (i) there is insufficient immediately available liquidity on the relevant execution venues to execute the relevant order in full; or (ii) where a client instructs us to work a relevant order over a period of time or by reference to a benchmark calculated over a period of time (such as VWAP); or where (iii) we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client, we may prioritise one or more of the other execution factors. In these cases, we will determine the relative priority of each execution factor on an order-by-order basis, where the order is executed manually, and by order type (e.g. iceberg, VWAP), where the order is executed using an algorithm.

We have a degree of discretion in how to apply the different execution factors and this may result in a range of different permissible approaches to executing client orders.

For further information on GS' best execution arrangements please refer to the relevant summaries which are available at: <http://www.goldmansachs.com/disclosures/mifid>

Topic 2: a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Goldman Sachs and persons connected with Goldman Sachs provide diversified financial services to a broad range of clients and counterparties and circumstances may arise in which Goldman Sachs may have a conflict of interest.

GSPIC is a member of the Goldman Sachs group of companies. Execution quality received from affiliated entities to whom GSPIC may receive and transmit orders is subject to the same monitoring and assessment utilized by GSPIC within the EMEA Securities Division Best Execution policy summary.

For further details on the execution venues used by GSPIC and its conflicts of interest policy, please refer to the EMEA Securities Division Best Execution policy summary which is available at: <http://www.goldmansachs.com/disclosures/mifid/>

Topic 3: a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Not applicable.

Topic 4: an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

There has been no change to the execution venues listed in GS' execution policy for the reporting period.

Topic 5: an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

A client's regulatory categorisation is an important factor both in the assessment of whether the client is relying on GS to deliver best execution and in providing best execution. The starting presumption is that professional clients do not legitimately rely on GS to protect their interests; however, these presumptions may be revised depending on the application of the four-fold test for determining legitimate reliance (set out below) to the particular circumstances of GS' interaction with the client and how the market operates for the relevant product.

Legitimate Reliance:

To determine whether a client is legitimately relying on GS to protect its interests, the following factors are considered:

- which party initiates the transaction - where GS approaches the client and suggests that the client should enter into a transaction, it is more likely that the client will be placing reliance on GS. Where the client initiates the transaction it is less likely that the client will be placing reliance on GS;
- market practice and the existence of a convention to 'shop around' - where the practice in the market in which a business area operates suggests that the client takes responsibility for the pricing and other elements of the transaction (e.g. there is a market convention to "shop around" for a quote), it is less likely that the client will be placing reliance on GS;
- the relative levels of price transparency within a market - if GS has ready access to prices in the market in which we operate and the client does not, it is more likely that the client will be placing reliance on GS. If GS's access to pricing transparency is equal or similar to the client's, it is less likely that the client will be placing reliance on GS; and
- the information provided by GS and any agreement reached - where GS's arrangements and agreements with the client do not indicate or suggest a relationship of reliance, it is less likely that the client will be placing reliance on GS.

Execution Factors

Subject to any specific instructions, GS will generally give the highest priority to:

- net price for professional clients

Under applicable law and regulation GS is not obliged to provide best execution when it executes orders on behalf of eligible counterparties.

Topic 6: an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

Not applicable as GSPIC does not have retail clients.

Topic 7: an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under RTS 27;

Data published under Delegated Regulation (EU) 2017/575 was not available for the reporting period covered by this report. However, GSPIC has in place post execution supervisory monitoring procedures which use market data,

where it is available, to assess client transactions against relevant market prices and benchmarks. For products with no observable external market data other criteria are used to benchmark client transactions for monitoring purposes. This monitoring is undertaken on a systematic basis via best execution monitoring systems.

Topic 8: where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU;

The relevant laws and regulations transposing Article 65 of Directive 2014/65/EU into national legislation did not apply for the reporting period covered by this report.
